

# Anderson Meadow

## New Trails created

The Anderson Meadow cleanup and trail creation was a high priority for the Loon Lake Land Conservancy. The cleanup included hiring an excavation team for the removal of a dangerous nuisance building. The building is well-hidden from the meadow, but needed to go.

A volunteer crew headed by board member Tim Cronin removed old fencing and trash from the meadow. A landscape crew was hired to mow new trails in the meadow. A special thanks to all the great volunteers and to all those who donated money for the project.
